

BOOK OF MAGIC—The Funny Trick Monkey

Directions

Cut out the monkeys and paste them on thin cardboard—the cardboard that comes from the laundry with papa's shirts is fine for the purpose. Then paste the two back to back, so that you have the complete monkey figure. Put a little weight in the pocket, as indicated by directions on page.

Stretch a string tightly between two places. The monkey will then balance from seven different points when hung on the string, as shown by the little diagram above.
